

Brunswick County, North Carolina

Construction and Demolition Debris Landfill Workshop  
David R. Sandifer County Administration Building  
October 19, 2009  
3:30 pm

1. C&D Debris tonnage Trend
  - Tonnage trend and observations
  - Comparison with Horry County, South Carolina
2. Remaining Capacity in C&D Landfill
  - Volume placed in C&D
  - Volume diverted to Sandlands
  - Results of 2009 Efficiency Study
  - Remaining capacity with and without diversion
3. Status of Permits
4. Update of 2007 C&D Debris Feasibility Study
  - Components of original study
    - Tonnage projections
    - Hauling and transfer station
    - Use of Area 6C
    - Expansion of landfill onto adjacent property owned by the County
  - The world has changed since the study
    - Tonnage projections
    - Current hauling operations
    - Transfer station costs
    - Expansion of Landfill onto non-County Owned Property
    - Tonnage Trends
5. Action Plan Schedule Flow Chart
  - Confirm County direction with C&D:
    - New C&D Landfill
      - Develop financing plan
      - Develop and submit site selection study for C&D Landfill
      - Develop and submit authorization to construct
      - Start construction of C&D Landfill
      - Close existing landfill
      - New C&D Landfill operational
    - Hauling Operation
      - Continue temporary transfer of C&D material
      - Develop plans for transfer station
      - Submit amended operation plan and transfer station
      - Procure bids for long-term C&D transfer
      - Transfer station operational
      - Close existing landfill
6. Curbside Recycling Discussion
